Testing
Playwright, Jest

KERRY LAVAL
SOFTWARE ENGINEER

Frontend engineer with 4 years of React and TypeScript experience. I take pride in my attention to detail and being thorough in my work and contributions to my team.

RELATED EXPERIENCE

Software Engineer   Remote
Olo   Aug 2021 – Aug 2024

- Frontend engineer on the Pay team. Served as feature owner for several projects, from scoping, design, implementation and delivery.
- Built modern React-based apps for payment processing and merchant onboarding for Olo's 700+ brands (Five Guys, Denny's...).
- Integrated with Stripe payment processor to create a React-based credit card elements library, leveraged both internally and by brands for online ordering.
- Created and maintained internal tooling, such as pricing plan management and report generation for customer support teams. Migrated 2 of these apps from jQuery to React.
- Assisted in improving and enhancing Olo's internal design system.
- Technologies used:
  - TypeScript
  - React and several React libraries
  - Context API/Redux
  - Playwright
  - Jest
  - Tailwind CSS

Web Developer   Lexington, MA
Skylla Technologies   Nov 2019 – Jan 2021

- Created browser-based human machine interfaces focused in robotics (frontend + backend).
- Technologies used:
  - JavaScript
  - React
  - Elixir and its ecosystem (Phoenix, Ecto, LiveView)
